Introduction

In this short introduction to your 2-page abstract for the summer school *Complex Motion in Fluids 2019*, you should briefly introduce the context of your study. Describe the aim of the work, and mention whether this is an experimental and/or theoretical and/or numerical study. A few references to important prior work in the literature could be given [1,2].

The purpose, length, and formatting of the abstract

The abstracts for *CMiF 2019* serve two purposes. They will be posted on the summer school website to promote scientific networking, and they will be used by the organizers to select contributions for the oral sessions and for the poster sessions. It is a tradition of the summer school that all participants, from the youngest students to the most seasoned researchers, present their ideas and/or results.

An abstract for *CMiF 2019* is limited to two A4 pages with 2-cm-margins on all sides, and written in font size 11 pt. For uniformity of the abstract book, please use the abstract templates for *Word* or *Latex* provided at the summer school website <http://www.fysik.dtu.dk/CMiF2019>. If a longer abstract is submitted, the extra pages will be discarded.

In terms of contents, the abstract should contain a *Title-Authors-Affiliation* section in the form and style defined by this template, then a section entitled *Introduction* as described above, followed by any number of *main sections*, and ending with two sections entitled *Conclusion* and *References*. Besides these few rules, no further restrictions apply.

Submission of the abstract at latest Friday 31 May 2019

The abstract is submitted at latest Friday 31 May 2019 as a pdf-file to bruus@fysik.dtu.dk using the subject field "CMiF 2019 abstract".

About figures

See Fig. 1 and its four sub-figures for an interesting observation, which seems to contradict other published data [3,4]. A verbose paragraph. A verbose paragraph. A short but important paragraph. A verbose paragraph. A verbose paragraph. A verbose paragraph. A paragraph with words. A verbose paragraph. A verbose paragraph. A verbose paragraph. A paragraph with words. A verbose paragraph. A verbose paragraph. A verbose paragraph. A verbose paragraph. A verbose paragraph. A verbose paragraph. A verbose paragraph. A verbose paragraph. A verbose paragraph. A verbose paragraph, and notice how Fig. 2 illustrates the remarkable behavior of the system.

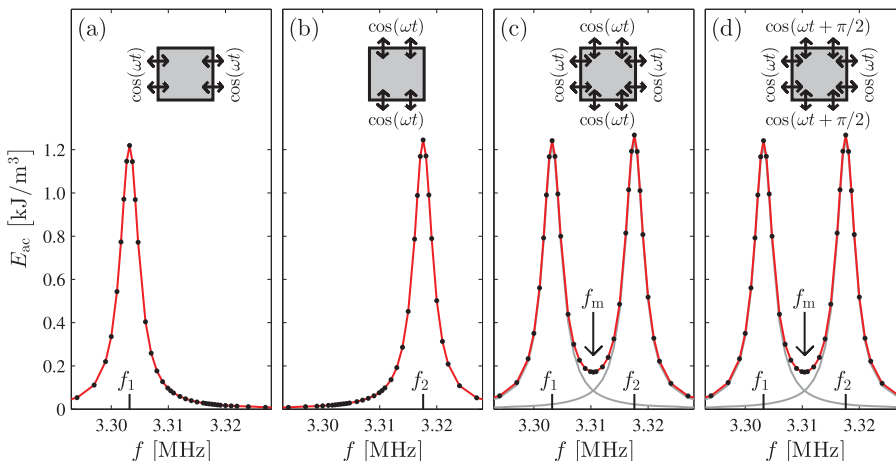

Figure 1: Perhaps you want the caption to the right of the figure, then follow the setup defined here. Note that the font size of the caption is 10 pt, which is smaller than the 11 pt of the main text. (a) Description of the first sub-figure. (b) The next sub-figure. (c) The third sub-figure. (d) Last but not least, the fourth sub-figure.
